

Information on Lead Content in Inks / Prop 65

Consistent with our core principles, Peerless strives to provide high quality, safe products for our customers. We are dedicated to working with our customers and suppliers to meet consumer product safety requirements applicable to our products, including any applicable California Proposition 65 standards.

Based on our knowledge of our product, lead generally has been the primary concern with respect to Proposition 65 and our customers who ship to or do business in California. With respect to lead content of the inks we use in particular, Peerless purchases inks from reputable suppliers in the United States that have well-established businesses.

When we purchase inks we receive Material Safety Data Sheets from the suppliers that list the contents and related safety information. If you would like a copy of the MSDS for a particular ink, please contact us and we will send it to you. In addition, if necessary, at a customer's request, we can arrange for testing of particular inks for lead content at the customer's expense.

If you have specific questions or would like to request additional information please contact your Peerless Umbrellas customer service or sales representative.

Also, we have posted additional information on our website regarding consumer product safety matters, including **“Information on California Proposition 65.”**
